Individual Written Assignment

Length: 1500 words (+/- 10%) (Not including the Reference List)

Task approach: Individual

Due date and time: Sunday 11:30 pm of Week 8

Feedback: Feedback will be provided via Canvas

Course Learning Outcomes Assessed

This assessment supports the following learning outcomes:

- CLO 1 Explain the societal, cultural, economic and financial impacts of digital health transformation on the safe, effective and efficient health care and service delivery and business models.

- CLO2: Examine the moral, social, legal, and ethical considerations in the experimentation, design, deployment, and evaluation of innovations for health and wellness.

Overview of Assignment

- In this assessment, you'll be thinking about the Electronic Patient Journey Board and its current placement in the location that we've put forward in the virtual hospital.

- You need to think about its location and whether there are any implications in relation to privacy or security that are implicating consumers and clinicians.

- Pay specific attention to the information we've given you in the scenario, because that will give you some key hints as to how you may wish to respond to the diBerent questions in the rubric elements.

- Also, if you have not looked at the Lectorial, this will give you a very good understanding of how to approach this assignment and watch the relevant virtual hospital video.

- Make sure you cover all of the different rubric elements, and ensure that you're familiar with what is required in this assignment to be successful. If you have any questions about this assignment, please ensure you raise this with your tutor in your workshops to ensure that you can all get the same answers.

- The use of electronic patient journey board (EPJB) has been implemented as a trial in the medical ward in University Hospital.

- It was implemented at the back of the nurses' station that all clinical and administrative staff can view and update using the electronic medical record system. It is easy to find and visible for anyone who passes by the nurses' station.

Review Module 5.3 and the Virtual Hospital.

The EPJB has the following information available to the clinicians to easily and quickly see the progress of their patients.

- Bed number
- First name
- Last name
- Date of birth
- Diagnosis
- Admitting doctor
- Date admitted
- Expected discharge date
- Outstanding referrals to clinicians (i.e. physio, OT, social worker and mental health)
- Personal clinical information pertinent to their current stay.

- Some of the nursing staff, patients and families and clinicians have complained that the journey board is breaking patient privacy. They state that it shouldn't be there and needs to be moved.

Sample of initial complaints

Sample of initial complaints

Nurse A	*"I love how it is easy to see all of the patients' information in one place, but can't other patients see the information?"*
Surgeon	*"I'm glad everything is on one board now, but why is it at the back of the nurses station?"*
Patient A	*"Why can I see other patients' information in the nurses station, I saw my next door neighbour is in hospital too!"*
Physio A	*"Surely this breaks some privacy with the information so easily seen?"*
Director	*"Who thought of putting it there? I love the EPJB, but it has to move!"*

The Director of Clinical Governance has asked you to identify and evaluate the issues being raised with respect to privacy and confidentiality.

1. **Problem Exploration:**
    1. Use the scenario to review the issues being raised and explore how these relate to privacy and regulation for different stakeholders.
    2. Students are expected to review the virtual reality scenario provided as background information to the case scenario.
2. **Individual Contribution:**
    1. Students will write an individual paper that covers the implications and challenges with regards to the scenario and privacy concerns
    2. Provide recommendations with regards to identifying suitable areas for the ePJB.

Suggested concepts to consider and cover

You may wish to consider the following questions when planning and writing your assignment:

1. What type of information is displayed on an electronic patient journey board? Is it general patient information or more personal / identifiable information?
2. What is the relevance of some of the concerns that people are raising with regards to the EPJB location?
3. Why is privacy and confidentiality important issues in healthcare and does this differ between clinicians and patients?

4. What are the underlying frameworks or legislation that healthcare organisations need to be aware of with regards to privacy and confidentiality?
5. What policies may healthcare organisations put in place to support patients right to privacy and confidentiality?

- **Reference List**
    - You must use citations (where appropriate)
    - You may use any referencing style you are used to so long as it is the same throughout your paper.

Your report **must be formatted** as follows:

- Aptos (12pt) font
- 1.5 Line Spacing
- Margins Normal at 2.54cm
- A4 size
- Orientation: Portrait

A cover page is **NOT** required.

Marking Rubric

1. **Discussion on the Issues Being Raised**

- **20 to >15.8 PtsHD (100 - 80%)**

- The paper identifies all of the key issues raised with regards to the Privacy and Confidentiality of the Electronic Patient Journey Board and takes into account the societal, cultural, economic and financial impacts.

2. **Identification of Relevant Privacy Provisions**
    - **20 to >15.9 PtsHD (100 - 80%)**

- The paper identifies ALL of the relevant privacy provisions related to the Privacy Act and Australian Privacy Principles relevant to the Electronic Patient Journey Board.

3. **Clarity and Depth of Issues with Examples**

- **20 to >15.9 PtsHD (100 - 80%)**

- Discusses issues with exceptional clarity and depth, demonstrating deep understanding and critical analysis with regards to the social, moral, legal and ethical considerations. Supported by well-chosen, highly relevant, and detailed examples that

effectively illustrate the application of the provisions in the Privacy Act and Australian Privacy Principles.

4. **Recommendation for EPJB Location**

- **20 to >15.96 PtsHD (100 - 80%)**

- Provides an exceptional, well reasoned recommendation that is well founded on all the relevant areas of the Privacy Act and Australian Privacy Principles. It accounts for Stakeholders concerns and perspective and considers other options in it's justification. There is well considered evidence that justifies the recommendation.

5. **Language and Grammar**

- **10 to >7.98 PtsHD (100 - 80%)**

- Exceptional use of sophisticated and engaging language with virtually no grammatical, punctuation, or spelling errors, enhancing the clarity and professionalism of the paper.

6. **Referencing**

- **10 to >7.98 PtsHD (100 - 80%)**

- Referencing is applied correctly and consistently throughout, enhancing the paper's credibility. References are consistent with current and contemporary digital health. Exceptionally accurate and thorough, all sources are cited correctly and consistently in the required format, demonstrating a deep understanding of referencing conventions. References expected 5-20.

Timeline	Activities
Week 5	• Review this assessment, assessment criteria and rubrics • Complete learning activities, participate in discussions, and research to learn more about the Electronic Patient Journey Board (EPJB), its features and functionality. • Compile and organise information found.
Week 6	• Complete learning activities. • Research privacy and confidentiality standards in healthcare, focusing on electronic medical records and patient information. • Identify specific privacy and confidentiality issues raised by different stakeholders. • Examine identified issues with reference to established standards. • Summarise and prepare an outline an outline of the issues.
Week 7	• Complete learning activities. • Evaluate the impact of the identified issues on patient privacy and confidentiality. • Research potential solutions and best practices for addressing the identified issues. • Develop recommendations for the placement of the EPJB to ensure compliance with privacy and confidentiality standards. • Review and refine recommendations.
Week 8	• Complete learning activities. • Draft the briefing report, including an introduction, identifies issues, evaluation and recommendations. • Share a draft of your report with peers for feedback. • Finalise the report, ensuring clarity, coherence and adherence to required format. • Submit the completed report through Canvas.
